

WEEK – 18

DURATION: 11 May 2026 – 15 May 2026

DAY 2: 12 May 2026

1. TASKS WORKED ON

- ***AI Response Renderer Development:*** Worked on improving the AI response rendering functionality in the MB-AI-Software project.
- ***Dynamic Response Handling:*** Implemented support for displaying trailer information, customer details, profile information, and text-based backend responses.
- ***Table & Card View Enhancements:*** Added functionality to show and hide tables and cards dynamically.
- ***UI Improvements & Bug Fixes:*** Improved data formatting, readability, responsiveness, and resolved rendering-related issues in the chat interface.

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned how to handle different backend response formats dynamically in React applications. I also improved my understanding of conditional rendering, data formatting techniques, and conversational AI interface design.

3. PLAN FOR NEXT WORKING DAY

Continue frontend testing and further enhance the AI chat interface.

DAY 3: 13 May 2026

1. TASKS WORKED ON

- ***Daily Diary Documentation:*** Prepared and organized internship documentation for college submission.
- ***Documentation Formatting:*** Structured daily reports in a professional week-wise and day-wise format.
- ***Frontend Testing:*** Tested frontend functionality after backend updates in the MB-AI-Software project.
- ***Debugging & Verification:*** Verified API responses, dynamic rendering behavior, and frontend-backend integration.

2. LEARNING AND KNOWLEDGE GAINED

Today, I enhanced my understanding of professional technical documentation and frontend testing processes. I also learned how backend changes impact frontend rendering and application behavior.

3. PLAN FOR NEXT WORKING DAY

Work on UI enhancements and improve user interaction features in the project.

DAY 4: 14 May 2026

1. TASKS WORKED ON

- ***UI Enhancement Activities:*** Improved the overall user interface and user experience of the MB-AI-Software project.
- ***AI Interaction Improvements:*** Enhanced response rendering using a typewriter effect and improved AI visual presentation.
- ***Customer Card & Table Enhancements:*** Improved the design and readability of customer cards and trailer tables.
- ***Resizer Implementation:*** Added resizer functionality to Staff Onboarding, Staff Approval, and Staff Information modules.

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned various techniques for improving AI-based user interfaces and modern frontend experiences. I also gained knowledge about responsive layouts, resizable workspaces, and interactive UI components.

3. PLAN FOR NEXT WORKING DAY

Implement resizer functionality in additional modules and continue improving project responsiveness.

DAY 5: 15 May 2026

1. TASKS WORKED ON

- ***Resizer Functionality Implementation:*** Implemented and optimized resizer functionality across multiple modules of the MB-USA-Trucking project.
- ***UI/UX Improvements:*** Fixed layout issues related to sidebar and content resizing behavior.
- ***E-commerce Project Analysis:*** Analyzed the reference design for the Raftaar E-commerce Project.
- ***Project Setup & Planning:*** Created the initial project structure using Next.js, TypeScript, and Tailwind CSS and prepared a development roadmap.

2. LEARNING AND KNOWLEDGE GAINED

Today, I improved my understanding of responsive layouts, reusable frontend components, and workspace optimization techniques. I also learned about modern e-commerce website architecture and frontend project planning.

3. PLAN FOR NEXT WORKING DAY

Start implementing reusable UI components for the Raftaar E-commerce Project and continue improving existing project modules.
