

WEEK – 19

DURATION: 18 May 2026 – 22 May 2026

DAY 1: 18 May 2026

1. TASKS WORKED ON

- **Home Page Development:** Completed the Home Page of the fashion ecommerce website using Next.js and Tailwind CSS.
- **Ecommerce Components Development:** Developed multiple reusable sections including Hero Banner, Featured Products, Trending Products, Testimonials, Instagram Showcase, and Footer.
- **About Us Page Development:** Created and completed the About Us page with responsive layouts and reusable components.
- **UI Refinements:** Improved responsiveness, typography, image rendering, spacing, and overall design consistency according to the reference website.

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned how to build scalable ecommerce interfaces using reusable React components and Tailwind CSS. I also improved my understanding of responsive layouts, image optimization, typography management, and component-based frontend architecture.

3. PLAN FOR NEXT WORKING DAY

Start development of the Shop Page and Contact Us Page while continuing UI refinements across the website.

DAY 2: 19 May 2026

1. TASKS WORKED ON

- ***Contact Us Page Development:*** Developed the Contact Us page and implemented responsive layouts.
- ***Website Optimization:*** Improved the Home Page and About Us Page by refining layouts, responsiveness, and visual consistency.
- ***UI Enhancements:*** Optimized spacing, alignment, and component behavior to improve the overall user experience.

2. LEARNING AND KNOWLEDGE GAINED

Today, I strengthened my understanding of responsive web design and page optimization techniques. I also learned how to improve user experience through consistent layouts and structured UI development.

3. PLAN FOR NEXT WORKING DAY

Continue working on project management activities and implement additional frontend improvements.

DAY 3: 20 May 2026

1. TASKS WORKED ON

- ***Project Workflow Management:*** Created and organized a task management board in Notion for the MB-USA-Trucking Software project.
- ***Task Tracking & Documentation:*** Structured project requirements, issue tracking, and module-wise task organization.
- ***Homepage UI Enhancements:*** Improved multiple homepage sections and refined the overall visual structure of the ecommerce website.
- ***Reusable Component Integration:*** Refactored pages using reusable frontend components and improved maintainability.
- ***Interactive UI Development:*** Added animations, hover effects, Instagram interactions, and testimonial slider functionality.
- ***Responsiveness & Optimization:*** Improved image rendering, responsiveness, and overall website performance.

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned the importance of structured project management and scalable frontend architecture. I also gained practical experience in implementing interactive UI elements, reusable components, and responsive design techniques using Next.js and Framer Motion.

3. PLAN FOR NEXT WORKING DAY

Continue working on frontend optimization and implement additional improvements on the ecommerce website.

DAY 4: 21 May 2026

1. TASKS WORKED ON

- ***Homepage Issue Resolution:*** Fixed image-related issues, navigation improvements, scrolling behavior, and website responsiveness.
- ***Performance Optimization:*** Enhanced frontend performance through animation optimization and rendering improvements.
- ***Next.js Image Optimization:*** Implemented image optimization techniques including lazy loading, responsive image sizing, and WebP conversion.
- ***Product Section Integration:*** Integrated backend-connected product cards into the homepage.
- ***Mobile Responsiveness Improvements:*** Improved responsiveness across multiple sections and optimized layouts for mobile devices.
- ***Mobile Navbar Development:*** Implemented a responsive hamburger menu and enhanced mobile navigation experience.

2. LEARNING AND KNOWLEDGE GAINED

Today, I gained practical knowledge of frontend performance optimization, responsive design strategies, image optimization techniques, and mobile-first development approaches. I also improved my understanding of production-level UI optimization and reusable component architecture.

3. PLAN FOR NEXT WORKING DAY

Continue development and optimization of the Raftaar Ecommerce Website.

DAY 5: 22 May 2026

1. TASKS WORKED ON

- ***Home Page Improvements:*** Enhanced multiple homepage sections, fixed UI issues, and implemented additional user interaction features.
- ***Authentication Pages Development:*** Created Login, Register, Forgot Password, and Login Account pages.
- ***About Us & Contact Us Optimization:*** Improved responsiveness, smooth scrolling, and page performance.
- ***Shop Page Enhancements:*** Fixed sidebar issues, improved responsiveness, and updated the overall theme styling.
- ***Performance Testing:*** Conducted testing across all pages to verify responsiveness, optimization, and functionality.

2. LEARNING AND KNOWLEDGE GAINED

Today, I improved my understanding of authentication page development, website optimization, responsive UI implementation, and frontend testing techniques. I also gained practical experience in improving website performance and ensuring consistent user experience across multiple pages.

3. PLAN FOR NEXT WORKING DAY

Continue working on live projects and further enhance website functionality, performance, and user experience.
