

DAY 2: 20 January 2026

1. TASKS WORKED ON

- ***Implementation of Switch Statements:*** Learned and implemented Switch Statements in JavaScript through multiple practical tasks.
- ***Implementation of Ternary Operators:*** Learned and implemented Ternary Operators using practical examples.
- ***Variables in JavaScript:*** Learned the concepts and differences between: let, Var and Const
- ***Looping Statements in JavaScript:*** Implemented Looping Statements through practical examples including:
 - Table Generation using for loop
 - General examples related to loops

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned important JavaScript concepts related to:

- Switch Statements
- Ternary Operators
- Variable Declarations (let, var, const)
- Looping Statements

3. PLAN FOR NEXT WORKING DAY

Learn nested loops and continue practicing JavaScript pattern-based problems.

DAY 3: 21 January 2026

1. TASKS WORKED ON

- ***Break and Continue Statements:*** Learned the use of break and continue statements in JavaScript loops.
- ***Nested Loops in JavaScript:*** Learned and implemented nested loops through multiple pattern-based tasks. The completed patterns included:
 - Simple Box
 - Left-Handed Triangle
 - Right-Handed Triangle
 - Equilateral Triangle
 - Inverted Triangle (Right and Left)
 - Cross Pattern

2. LEARNING AND KNOWLEDGE GAINED

Today, I improved my understanding of nested loops, loop control statements, and pattern generation logic using JavaScript. I also strengthened my logical thinking and problem-solving skills through pattern-based programming tasks.

3. PLAN FOR NEXT WORKING DAY

Continue working on frontend development concepts and responsive website creation.

DAY 4: 22 January 2026

1. TASKS WORKED ON

- ***Responsive Coffee Website Development:*** Worked on developing a responsive commercial Coffee Website using HTML and CSS. The completed sections included:
 - CSS Layout
 - Navbar
 - Forms
 - Map Integration
 - Contact Us Section
 - Footer

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned important frontend and JavaScript concepts including:

- Display Properties in CSS
- Map Integration using CSS
- Icons Integration
- Mobile-Friendly Website Design
- Objects in JavaScript
- Arrays in JavaScript

3. PLAN FOR NEXT WORKING DAY

Learn JavaScript methods and continue improving the responsive website.

DAY 5: 23 January 2026

1. TASKS WORKED ON

- ***Responsive Coffee Website Completion:*** Continued working on the commercial Coffee Website using HTML and CSS. The completed pages included:
 - Home Page
 - About Us Page
 - Blog Page
 - Contact Page
 - Coffee Page

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned various CSS concepts, including sliders, and explored JavaScript array methods such as `push()`, `pop()`, `sort()`, `reverse()`, `slice()`, `splice()`, `forEach()`, `map()`, `filter()`, and `reduce()`. I also gained an understanding of the synchronous and asynchronous nature of JavaScript and how these concepts impact program execution and responsiveness.

3. PLAN FOR NEXT WORKING DAY

Practice examples related to asynchronous behavior and explore additional methods of arrays and objects.

WEEK – 1

DURATION: 12 January 2026 – 17 January 2026

DAY 1: 12 January 2026

1. TASKS WORKED ON

- ***Basics of Slack:*** Learned the basic concepts and working of Slack as a communication and collaboration platform.
- ***Basics of Git Commands:*** Learned the fundamentals of Git and basic version control workflow.
- ***Basics of JavaScript:*** Studied the basic concepts of JavaScript including its synchronous nature and data type operations.

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned the fundamentals of Slack, Git, and JavaScript. I also improved my understanding of JavaScript data types and how mathematical and concatenation operations behave with different types of data.

3. PLAN FOR NEXT WORKING DAY

Learn advanced Git concepts and understand the workflow of GitHub repositories and branching.
