

WEEK – 3

DURATION: 26 January 2026 – 30 January 2026

DAY 2: 27 January 2026

1. TASKS WORKED ON

- ***Asynchronous JavaScript Examples:*** Learned and implemented examples related to the asynchronous nature of JavaScript.
- ***Fetch API Implementation:*** Learned and implemented the fetch() method in JavaScript for retrieving data from external links and APIs.

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned key JavaScript concepts related to asynchronous programming and DOM manipulation, including the use of the fetch() method for handling API requests. I also explored various DOM access and manipulation methods such as getElementById(), querySelector(), setAttribute(), getAttribute(), toggle(), removeAttribute(), and hasAttribute().

3. PLAN FOR NEXT WORKING DAY

Learn Event Listeners in JavaScript and complete tasks related to DOM manipulation.

DAY 3: 28 January 2026

1. TASKS WORKED ON

- ***Basics of DOM Manipulation:*** Learned how to access and manipulate webpage content and structure using DOM concepts.
- ***Event Handling in JavaScript:*** Learned how events are handled in JavaScript and how data can be manipulated dynamically using event listeners.
- ***JavaScript Practice Tasks:*** Worked on practical JavaScript tasks related to the concepts learned. The completed tasks included:
 - Mode Changer
 - Social Media Likes
 - Password Checker

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned important concepts related to Event Handling in JavaScript and improved my understanding of interactive frontend functionality.

3. PLAN FOR NEXT WORKING DAY

Complete the remaining tasks and continue practicing JavaScript concepts.

DAY 4: 29 January 2026

1. TASKS WORKED ON

- ***Responsive Navbar Toggle:*** Implemented a responsive navigation bar where the menu visibility is controlled using button click events, similar to hamburger menu functionality.
- ***Scroll Progress Indicator:*** Created a dynamic scroll progress indicator that visually displays how much of the page has been scrolled.
- ***Keyboard Shortcut Features:*** Implemented keyboard shortcut functionalities.
- ***Form Validation with Events:*** Started implementing form validation functionality using submit events and dynamic error handling.

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned important concepts related to Event Handling in JavaScript and improved my understanding of interactive frontend functionality.

3. PLAN FOR NEXT WORKING DAY

Complete the remaining task related to Search Filter Functionality.

DAY 5: 30 January 2026

1. TASKS WORKED ON

- ***Form Validation with Events:*** Completed form validation functionality using submit events and dynamic error message handling.
- ***Search Filter Functionality:*** Implemented a live search filter that dynamically filters a list of items based on user input.
- ***Practice of Destructuring (Arrays and Objects):*** Practiced destructuring arrays and objects through multiple examples.
- ***Practice of ...Rest and ...Spread Operators:*** Learned and practiced the use of ...rest and ...spread operators through practical examples.

2. LEARNING AND KNOWLEDGE GAINED

Today, I strengthened my understanding of event handling through real-world JavaScript examples. The topics learned included:

- Destructuring Arrays and Objects
- ...rest Operator
- ...spread Operator

3. PLAN FOR NEXT WORKING DAY

Start learning React concepts and continue improving frontend development skills.
