

WEEK – 7

DURATION: 23 February 2026 – 27 February 2026

DAY 1: 23 February 2026

1. TASKS WORKED ON

- **Live Project Work:** Worked on the live project and revised React and Tailwind concepts by implementing them practically within the project.
- **React & Tailwind Revision:** Revised important concepts related to React and Tailwind CSS and implemented them in the project for better understanding and practical exposure.
- **SK-Trophy Project Updates:** Worked on multiple sections of the SK-Trophy project and completed various UI corrections and feature updates including: Searching Modal, Prize Description Page, Awards Display Page, Account Page, Feedback Corrections, Navbar Corrections

2. LEARNING AND KNOWLEDGE GAINED

Today, I learned how React and Tailwind CSS work together to create responsive and reusable frontend interfaces. I also improved my understanding of component-based UI development and styling integration using Tailwind CSS within React applications.

3. PLAN FOR NEXT WORKING DAY

Complete the remaining project tasks and continue improving the project structure and implementation.

DAY 2: 24 February 2026

1. TASKS WORKED ON

- ***Live Project Completion & Optimization:*** Completed the live project and focused on improving its structure and maintainability. I optimized the code for better performance, created reusable components, and organized the project using a clean and scalable directory structure.
- ***React & Tailwind Practical Implementation:*** Revised React and Tailwind concepts again by implementing them within the live project environment.

2. LEARNING AND KNOWLEDGE GAINED

Today, I improved my understanding of how React and Tailwind CSS work together in real-world projects. I also strengthened my practical knowledge of reusable components, project optimization, and maintaining a proper frontend directory structure.

3. PLAN FOR NEXT WORKING DAY

Continue learning new concepts related to React and work on additional practical tasks.

DAY 3: 25 February 2026

1. TASKS WORKED ON

- Practice of JavaScript Concepts: Completed multiple JavaScript practical tasks to strengthen my understanding of DOM manipulation, event handling, and dynamic UI updates. The tasks completed included:
 - Text Changer
 - Color Painter
 - Input Reader
 - Link Updater
 - Vanishing Image
 - Counter Application
 - Dark Mode Toggle
 - Password Validator
 - Shopping List
 - Toggle Show/Hide Functionality
 - Shopping Cart
 - Tabbed Interface
 - Task Filter
 - Live Form Validator

2. LEARNING AND KNOWLEDGE GAINED

Today, I revised previously learned JavaScript concepts through multiple practical implementation tasks. I improved my understanding of DOM manipulation, event handling, dynamic rendering, validation logic, filtering, and state-based UI updates.

3. PLAN FOR NEXT WORKING DAY

Learn additional concepts related to React and continue improving JavaScript practical skills.

DAY 4: 26 FEBRUARY 2026

1. TASKS WORKED ON

- **Quiz App Development:** Developed a simple Quiz Application that displays questions, checks selected answers, updates scores dynamically, and moves to the next question.
- **Shopping Cart Development:** Built a Shopping Cart system that stores items as objects, displays them dynamically in a list, and calculates the total price automatically.
- **Tabbed Interface Implementation:** Created a tabbed interface system that switches visible content dynamically by adding and removing classes when tabs are clicked.
- **Task Filter System:** Developed a task management system where users can: Add tasks, Mark tasks as completed, Filter tasks dynamically using array filtering concepts
- **Live Form Validator:** Completed the implementation of a live form validation system that displays validation errors dynamically and enables the Sign Up button only when all input fields are valid.

2. LEARNING AND KNOWLEDGE GAINED

Today, I revised important JavaScript concepts through practical implementation tasks and strengthened my understanding of dynamic rendering, validation handling, object management, filtering, and event-driven programming.

[Blog link here](#)

3. PLAN FOR NEXT WORKING DAY

Learn additional concepts related to React and continue improving frontend development skills.

DAY 5: 27 February 2026

1. TASKS WORKED ON

1.1 Revision & Practice of Frontend Concepts

Continued revising previously learned frontend concepts and practiced JavaScript-based implementation tasks for strengthening practical development skills.

1.2 React Learning Preparation

Prepared for upcoming React concepts by reviewing the fundamentals of frontend development and component-based architecture.

2. LEARNING AND KNOWLEDGE GAINED

Today, I strengthened my understanding of frontend development concepts through revision and implementation-based practice. I also revised important JavaScript concepts that will help in learning advanced React development concepts.

3. PLAN FOR NEXT WORKING DAY

Learn new React concepts and continue improving practical frontend development skills.
