

NOTION (Tasks)

TASK 1 (Create a Documentation Page)

1. Create a new Notion page titled "Project Documentation".

Solution: The link for this task is as follows:

✈ [PROJECT DOCUMENTATION \(Task 1\)](#)

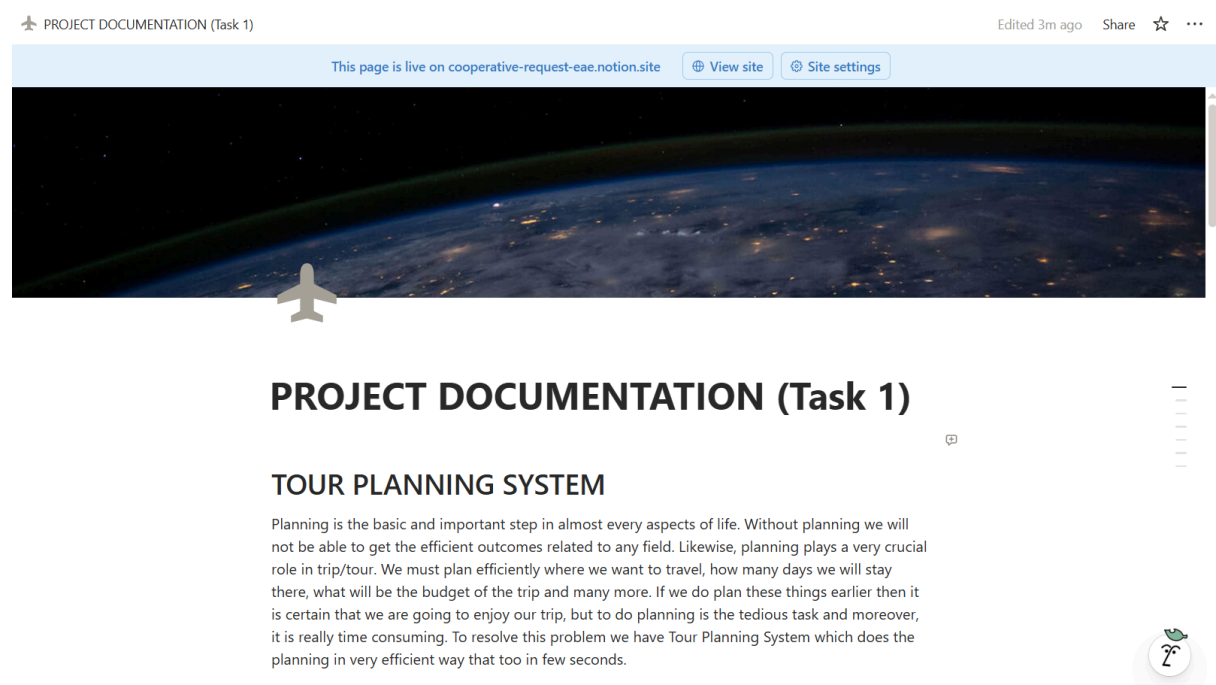

Fig 1: Project Documentation using notion

TASK 2 (Template Usage)

1. Create or use a Notion template for documentation or meeting notes.

Solution: The link for this task is as follows:

Work Focus: Project Workspace (Task 2)

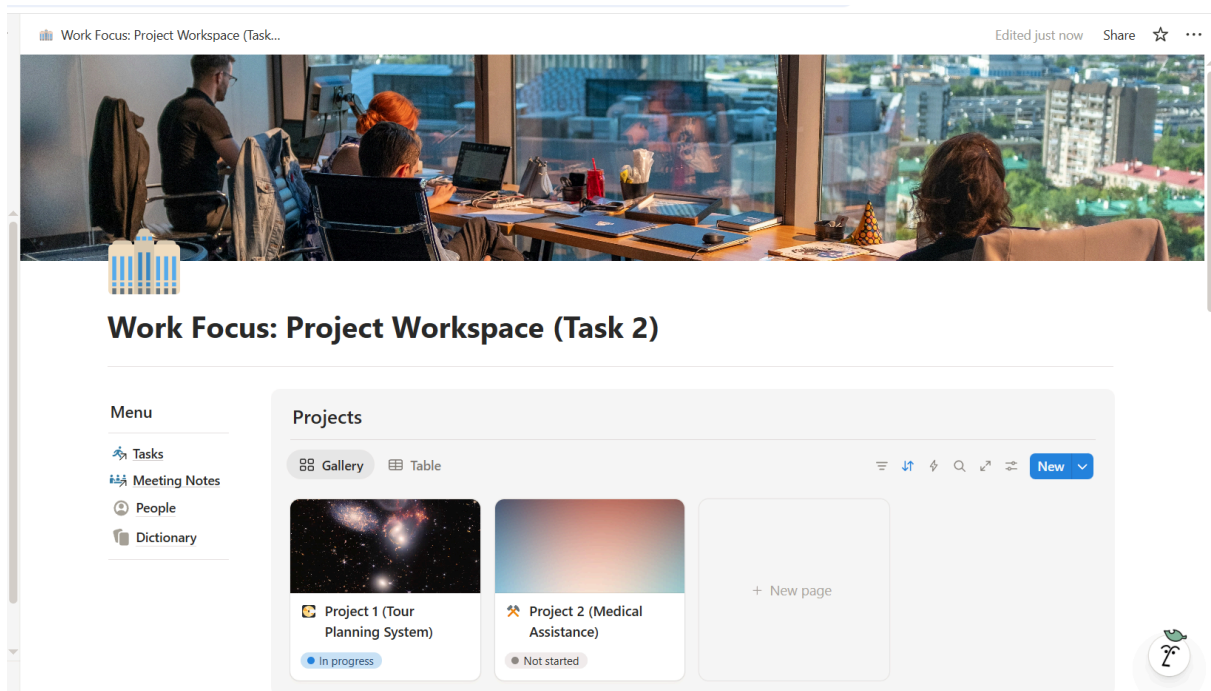

Fig 2: Displaying the Project Documentation using a template

2. Explain why using a template is better than creating a document from scratch every time.

Solution: Notion is a powerful productivity tool that helps to create pages for notes, tasks, projects, and more. It helps us to work easily and flexibly.

REASONS FOR USING TEMPLATES

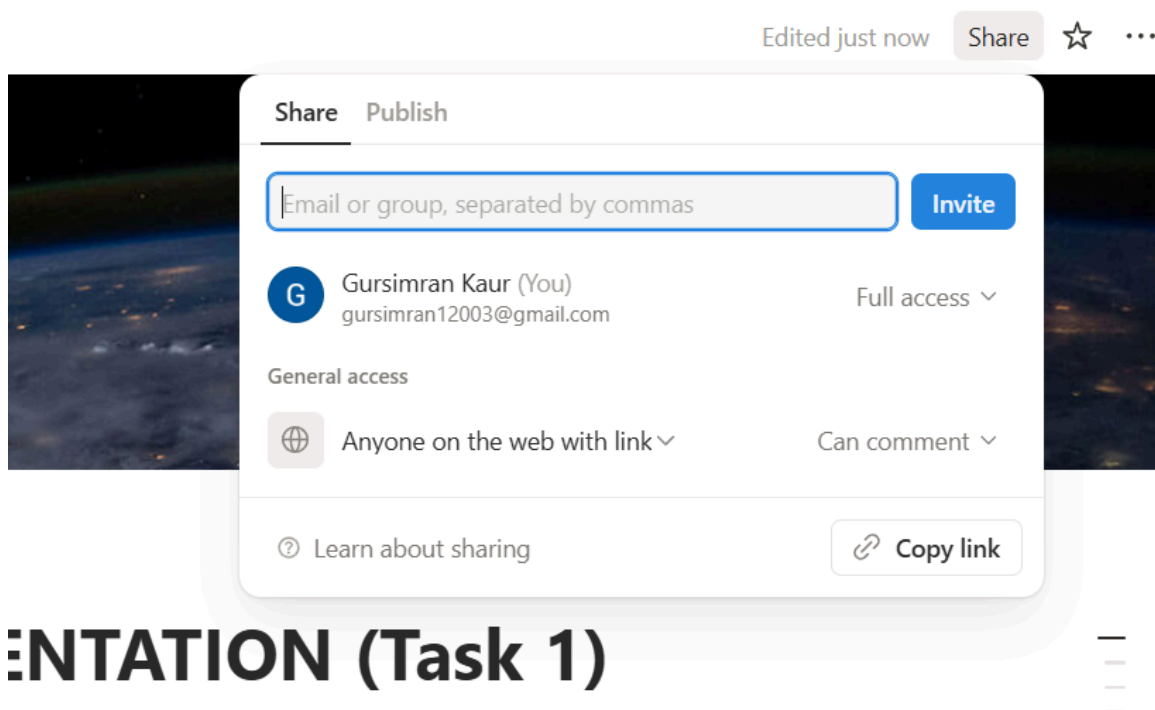

- It **saves time** because you don't have to recreate the same structure again and again.
- Keeps your pages consistent in **InDesign, format, and styles**.
- **Reduces mistakes** since the structure is already prepared.
- **Boosts productivity** by letting you focus on content instead of formatting.
- Makes **team collaboration easier** because everyone follows the same layout.

- Reusable and customizable, so you can edit a template once and use it anytime.
- Improves workflow by giving you a ready-made starting point.

TASK 3 (Sharing & Publishing)

1. Make the Notion document public.

Solution:

INTRODUCTION (Task 1)

Fig 3.1: Making the notion document public

2. Enable Share to web.

Solution:

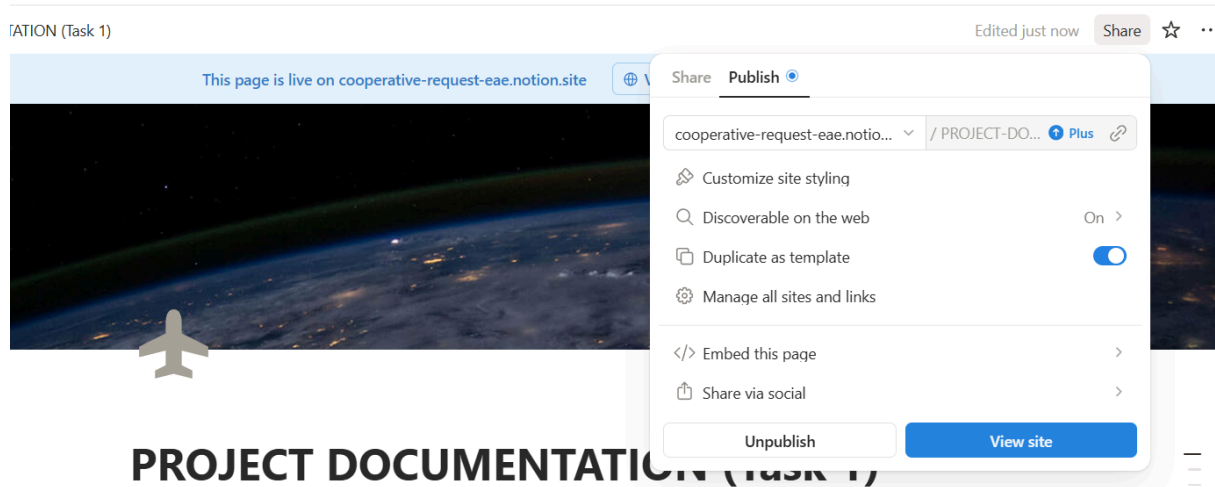

Fig 3.2: Enabling share to web

3. Copy and submit the public link.

Solution: The public links are as follows:

- **Web Link:** https://www.notion.so/PROJECT-DOCUMENTATION-Task-1-2eaed8290d238035bc58e69cfe9aa9ed?source=copy_link
- **Live site Link:** https://cooperative-request-eae.notion.site/PROJECT-DOCUMENTATION-Task-1-2eaed8290d238035bc58e69cfe9aa9ed?source=copy_link

4. Explain the difference between private, shared, and public pages.

Solution: The difference is as follows:

Feature	Private Page	Shared Page	Public Page
Access	Only the page owener can access it.	Only invited users can access.	Anyone with the link can access.
Visibility	Completely hidden from others.	Visible only to selected people.	Visible on the open web
Security Level	very high	High (controlled sharing)	Low (open Access)

Collaboration	No collaboration possible	Real-time collaboration is possible.	Usually view only but we can enable editing as well.
Editing Rights	Only owner can edit this.	Editing rights can be controlled (view/comment/edit)	Editing is usually disabled.
Use Case	Personal notes, private drafts.	Team projects, group assignments, shared work.	Portfolios, reports, published pages.
Link Access	No link sharing available	Link works only for invited users.	Public link works for anyone.
